

# New Items

# Your Nr. 1 in contemporary Japanese tableware

We design, craft and distribute top quality oriental tableware for households and businesses worldwide. Our established brand Tokyo Design Studio is inspired by Japanese culture and praised for its refined contemporary designs and high-quality standards.

With design teams located in both The Netherlands and Japan we aim to create a unique and constantly evolving signature. Respecting centuries of porcelain and pottery heritage, we constantly look for unexpected perspectives that help us create the tableware of today and tomorrow.

Our products are authentic by nature. Predominantly made in Japan by artisanal methods perfected over 400 years. Our pad-printed products are baked twice, then decorated one color at a time, glazed, and baked again. Throughout the process a meticulous quality control is applied, making sure each product is of the highest quality.

# Nippon Blue

Nippon Blue is one of our classics, never out of date. Its lustrous decorations are an eclectic mix of traditional Japanese and newly designed motifs in the signature shade of deep blue. Nippon Blue is available in a complete range of coffee and tea mugs, cups and pots, breakfast and dinnerware sets, everything you need for a beautifully set table. Style it with other pieces from the Nippon Blue collection, or with white for an elegant look

# Nippon Black

Nippon Black combines the best of two worlds. The elegant shapes, decors and high quality porcelain are traditional Asian, while the clean black-and white is inspired by the minimalism of contemporary Scandinavian design. With a host of different decors to combine and play with, they add a subtle surprising touch to any interior style.

# Kyusu

Kyusu are traditional Japanese teapots mainly made of fired volcanic clay of very high quality. The word kyusu simply means teapot, even though in common usage kyusu usually does refer to a teapot with a side handle.

They originally came from ancient China and have been naturalized into Japanese culture over the centuries for the preparation of Japanese green tea. Kyusu are usually smaller than a western teapot, around 100-300 ml (3-10 fl. oz) is common. A teapot with a volume of more than 300ml (10fl. oz) is perfect for several guests.

# Grey Soshun

Chic and elegant, this new member of our soshun series features different shades of grey applied with an awesome glaze which results in a mixed glossy and matte finish... Starring the debossed print of iconic Japanese Cherry Blossom, also known as Sakura, this magnificent tree blossoms in early spring (soshun) throughout Japan.

# Hangiri Sushi Rice Mixing Bowl

Hangiri, also known as handai bowls are a traditional tool used in Japan to mix sushi rice and seasoning. They are

made from uncoated cypress wood, which is a softwood. Two copper bands are attached around the outside of the bowl which are usually loose from new. This is because the bowl will swell and as such they require special care before the first use, after use and before every consecutive use. The care will properly season the bowl and also ensures that the bowl will not crack.

## Before your first use

The first step is to properly season your hangiri and remove the bitterness of the wood. To do this, fill the hangiri with water and add 1/4 cup of rice vinegar and let it sit over night. The next day, pour out the solution and wash with clean water (no soaps or harsh detergents) and dry hastily with a clean soft towel. Do not allow the bowl to sit in direct sunlight or in a warm environment as this will risk cracking the bowl.

## Before every use

While you are cooking your sushi rice, fill the hangiri with water for around 30 minutes before your rice is ready and let it sit. Before you add any hot rice to the bowl, make sure that all of the water is drained and dab with a clean cloth. If the hangiri is too wet, it will soak into the rice and make it too moist. If you add the rice to a hangiri that is not properly soaked, the rice will stick to it and the bowl would soak up much of the rice seasoning resulting in a bland sushi rice.

## After every use

Often, some rice will be stuck to the bowl, but as you soaked it before use, there should not be so much. If there is any rice stuck to the bowl, fill the bowl with warm water and let it sit. Use a cloth or a soft brush to remove any rice that did not free from the water.

At any point in the hangiri's life, do not use any chemicals or even any dish soap to wash it. It is also very important that the bowl is dried correctly after use. Dry thoroughly with a towel and make sure that the bowl has adequate air flow to it so that the wood dries out. However, do not dry the bowl in the sun as this may warp or even crack the wood. Do not leave the bowl too wet as it could cause mould growths. If the bowl starts to discolour, use diluted lemon juice to brighten the colour.

# Chopsticks

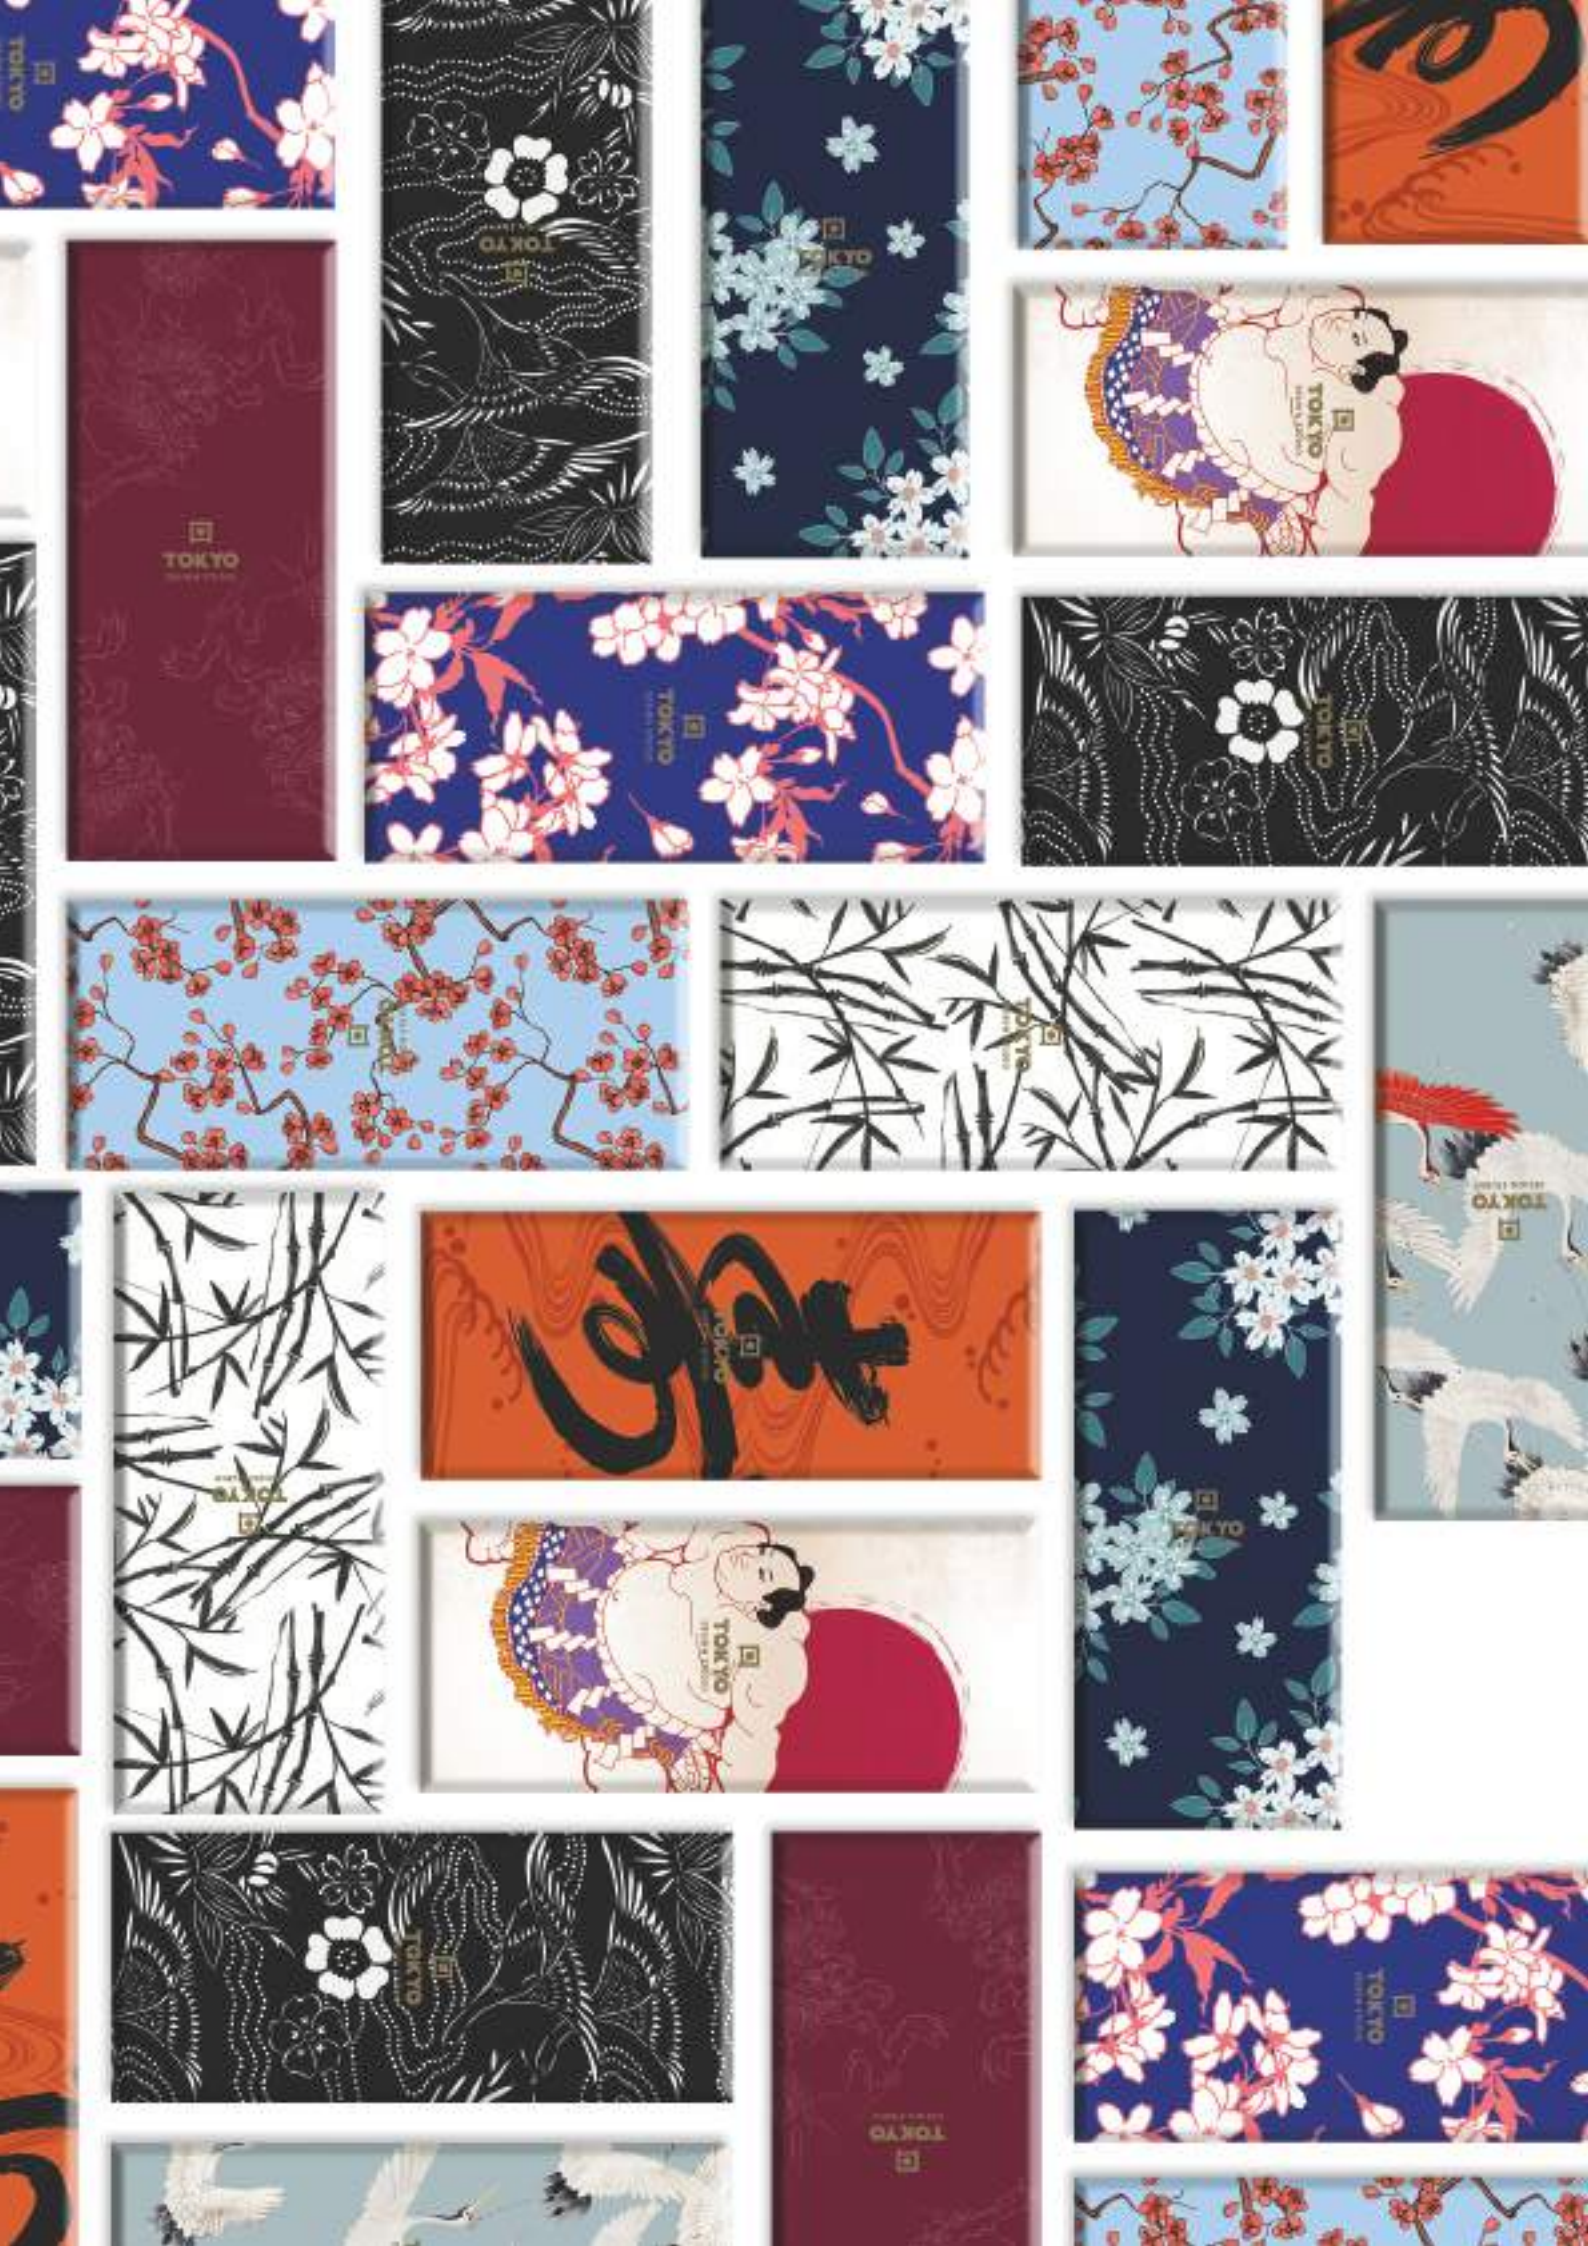

Chopsticks are originally found in Henan province of China and were then introduced in the Japanese culture. Different cultures adopted different chopstick in Asian countries. This explains the chopsticks differences in length and materials; such as wood, bamboo, and metal for example.

Tokyo Design Studio's chopsticks collections range from single pack, 5 pair set with and without giftbox to 50 pair in a wooden box; also for kids.

With chopsticks, you can bring Eastern tradition into your home.

## How to read the product information

### COUNTRY OF ORIGIN

China

## Product maintenance

### WOOD & BAMBOO

Wooden items are not suited to use in an (industrial) dishwasher. The surface of the product can be maintained by regularly rubbing it with vegetable oil.

Wooden items must be washed in warm soapy water and then dried directly.

Wood & Bamboo is a natural product and will show wear and tear after a period of use.

### STAINLESS STEEL

Stainless steel chopsticks are all safe for dishwashers. Some chopsticks might drop through most dishwasher silverware baskets however, so you will need to line the basket or lay the chopsticks flat on the glass rack.
